        "Tech Skills": {
                "Frontend": "HTML5, JS, TS, Bootstrap, Angular 2+, Vuejs",
                "Backend": "Groovy with Grails, Java with SpringBoot, Nodejs with Express",
                "Database": MySql, MongoDB, RabbitMQ"
        },
        "Degree": "University of Texas at Arlington / BS in CSE (2007 - 2011)"
};
```

```
/**
* @job Software Engineer / JP Morgan Chase ( Aug 2020 - Present )
*        - Build internal Java SpringBoot apps
*
* @job Senior Full-Stack Developer / Spireon Inc ( July 2014 - Aug 2020 )
*        - Used AWS IoT & Serverless Framework to repair malfunctioning IoT devices in prod
*        - Rewrote a reverse geo-location Grails plugin into a stateless Java Spring Boot
microservice with 70%+ test code coverage and made it scale using Redis and Docker.
*        - Built and led the frontend development for a stateless Single Page App (SPA) in (
Angular 4 used to resolve issues when importing sales data from 3rd parties.
*        - Sped up deployments by fixing CI/CD Jenkins and doing daily Github code reviews
*        - Implemented front-end unit testing for 2 projects and increased code coverage from 0%
to 30%+. Used Sinon.js, Qunit.js and Ember-Qunit.
*        - Develop internal tools and APIs to interface with external wireless telecom providers
and to troubleshoot devices within our platform
*
* @job Web Application Developer Analyst / Blue Cross Blue Shield (April 2012 – June 2014)
*        - Helped maintain and add new features to an enterprise enrollment system that was
used by a few thousand employees and external agents.
*        - Created a file upload manager that allowed users to upload 1 - 20 documents at once
and then modify a few file attributes attached after being uploaded using JSP, Javascript,
jQuery 1.7, CSS, SWF (Adobe)
*
* @note Completed Hacktoberfest hosted by Github, DigitalOcean and DEV (2017, 2018 &
2019)
* @note I love rock climbing, running 5Ks - half marathons and tennis / pickleball.
