Larry Battle

Frisco, TX | www.larrybattle.me | job.d@larrybattle.me

Summary: True full stack web developer focused on results, leading and mentoring.

- Frontend: HTML5, JS, TypeScript, CSS3, Bootstrap, jQuery, Angular 2+, Vuejs, Emberjs
- Backend: Groovy, Grails, Java, Spring Boot, Nodejs, Express, Google Go
- Database: MySql, Redis, Elastic, MongoDB, RabbitMQ

Experience

Senior Full-Stack Developer / Spireon Inc (April 2017 - Present)
- Used **AWS IoT** & **Serverless Framework** to repair malfunctioning IoT devices in prod
- Rewrote a reverse geo-location **Grails** plugin into a stateless **Java Spring Boot** microservice with 70%+ test code coverage and made it scale using **Redis** and **Docker**.
- Built and led the frontend development for a stateless Single Page App (SPA) in **Angular** 4 used to resolve issues when importing sales data from 3rd parties. **Increased sales** by 10%+ by quickly unblocking roadblocks and fulfilling the orders.
- Created web components with **Vuejs** 2 to construct a Webhook editor. The editor allows customer reps to update Account webhook configs on the fly. What took 4 people to release a config update, now takes 1.
- Sped up deployments by fixing **CI/CD** Jenkins and doing daily Github **code reviews**

Full-Stack Developer / Spireon Inc (July 2014 - April 2017)

- Work on agile teams with an average of 3 software engineers to add features and bug fixes to multiple client facing single page applications (SPA)
- Implemented front-end **unit testing** for 2 projects and **increased code coverage** from 0% to 30%+. Used Sinon.js, Qunit.js and Ember-Qunit.
- Develop internal tools and APIs to interface with external wireless telecom providers and to troubleshoot devices within our platform

Web Application Developer Analyst / Blue Cross Blue Shield (April 2012 – June 2014)

Helped maintain and add new features to an enterprise enrollment system that was used by a few thousand employees and external agents. Created a file upload manager that allowed users to upload 1 - 20 documents at once and then modify a few file attributes attached after being uploaded using JSP, Javascript, jQuery 1.7, CSS, SWF (Adobe)

Education, Certifications & Awards

- University of Texas at Arlington / BS in **Computer Science and Engineering** (2007 - 2011)
- Machine Learning - Coursera Course Certificates, License GEQL6GJMNKVV
- C100DEV: MongoDB Certified Developer, Associate Level License 101-188-175
- Completed **Hacktoberfest** hosted by Github, DigitalOcean and DEV (2017, 2018 & 2019)
- I love rock climbing, running 5Ks - half marathons and **tennis** / pickleball.
